Trading is a game of unemotional precision. Precision requires ample planning and execution, however, first and foremost, before planning can begin, you must be armed with an overarching strategy. Unlike tactics, your strategy is a longer term, high level guiding light which is achieved through consistent application of tactics that roll-up and contribute to the achievement of the strategy. In ...

High-frequency trading (HFT) is a type of algorithmic financial trading characterized by high speeds, high turnover rates, and high order-to-trade ratios that leverages high-frequency financial data and electronic trading tools. While there is no single definition of HFT, among its key attributes are highly sophisticated algorithms, co-location, and very short-term investment horizons.
