The kit allows those with Audyssey Pro-enabled AVRs or processors to achieve a professional level room calibration, using a laptop and the individually calibrated, more accurate, mic. Please note that Audyssey requires every AVR or AVP with which the kit is used to buy a separate license from them which costs \$150.

Ich sehe das weniger als "Update" sondern eher also neues "kann Feature" - ähnlich dem Pro Kit. Besser die Wahl 20€ zu bezahlen haben als von vorne rein das Gerät 20€ teurer zu machen. Es wird denke ich genügend Leute geben die es sich holen werden. Lg Florian . HeimkinoMaxi Inventar #17 erstellt: 29. Dez 2016, 17:21: Die App kann was und das darf auch etwas kosten. 20€ finde ich ...

Now for my question; can I setup Audyssey so as not to overlap the hard knee house curve settings I'm planning to make with the sub EQ, or will I have to buy the Audyssey PRO kit for that? Thanks, Tom [edit. That should help, in theory, after that you can try Audyssey bypass again to see if things improved. If not, you may want to try some manual adjustment of the subwoofer's phase. I agree ...

The MultEQ Pro CD that comes in your Installer's Kit is serial-number-matched to the microphone. The Audyssey microphone is calibrated to an \$8000 Bruel & Kjaer 4136 reference. Each individual microphone's calibration-to-the-4136 data package is stored on the like serial numbered MultEQ Pro installation disc that comes as part of the kit. In my experience with measurement microphones the ...

Thanks to Sonnie, I had the opportunity to order the Audyssey MultEQ Pro Calibration Kit. I was very reluctant to order it because I wasn't sure just exactly how valuable it would be as a tool. Part of my early frustration was that it seemed like there wasn't much information about it publicly available, even though it's available for purchase to end-users. Some dealers might give you a break ...

The Audyssey Pro Installer Kit, or more simply 'Audyssey Pro', is the next and ultimate step in Audyssey calibration. The Pro Kit consists of a high-quality, individually calibrated mic and preamp, a good mic boom stand, all the required cables needed for hookup and the Audyssey Pro software to run on your Windows® laptop where the results of the measurements are 'crunched' to create appropriate ...

The Audyssey Pro Kit, along with the XTZ Room Analyzer, will give a home user a full complement of tools for you to give your best shot at improving the sound in your room. Other Features-The Room Analyzer has several additional features that can allow you to conduct various tasks. As mentioned above, the software does contain an SPL meter function that can be used for setting speaker levels ...

[Audyssey Sound Equalizer - General AV Discussion - StereoNET](#)

Du darfst die Pro-Version nicht mit dem integrierten XT32 verwechseln. Für Audyssey-Pro musst du ein separates Kit erwerben, welches ein kalibriertes Mikro und eine PC-Software beinhaltet. Zusätzlich muss für den eigenen AVR eine Lizenz erworben werden. Alles in allem nochmal ca. 600€ extra Investition.

Huge drawback-you can't set curves for each speaker individually (without a pro kit). So for my center channel I might like to keep all the high end (Audyssey "flat") for vocal intelligibility, but on all the other speakers I prefer the high-end roll off that Audyssey incorporates (standard "Audyssey" setting). In the pro kit, you can set the level of high end roll off for each speaker.

[Room Correction Revisited - HomeTheaterReview.com](#)

I then ran Audyssey Pro as usual and have the system mostly dialed in. In my case, with a treated room, turning off DEQ does not improve anything. All it does on my system is remove the bass at lower volume levels. If I turn Audy off completely, I lose quite a bit of my mid range. On my system, Audyssey greatly improves the overall balance of the entire system. I tried both 5.1 material, as ...

[Audyssey MultEQ XT32: confession of a digital room ...](#)

So based on this statement from Audyssey, the manual for the Integra actually agrees with what Audyssey recommends and that is to go back and set any speakers to "small" and to start out by using the 80hz recommendation regardless if the receiver/pre-pro (not Audyssey) set them to "large/full range". Also in Mr. Kumin's review of the Integra, he says that Audyssey set his crossovers for his ...
